## Experience

Customer Support Representative · **FPL** Dec 2022 — March 2023

- Handled more than 100 customer calls daily with prompt and efficient response.
- Utilized strong problem-solving skills and product knowledge to deliver exceptional customer service while contributing to the company's goals.

## Projects

### Weather Application

github.com/cheternal7890/Weather-App

- Developed and styled an interactive weather application that forecasts daily weather conditions by leveraging the OpenWeatherMap API.
- Users can input any city around the world and retrieve data that dynamically changes the appearance of the application based on the weather.
- Technologies used: HTML, CSS, JavaScript, DigitalOcean.

### Hulu Clone

github.com/cheternal7890/Hulu-Clone

- Architected and built a fully interactive front-end clone that resembles Hulu's website using color branding designs that align with its standards, providing an experience that users are reminiscent of.
- Implemented responsive design principles for optimal viewing across mobile and desktop.
- Technologies used: HTML, CSS, Font Awesome Toolkit, Netlify.

### Apple Clone

github.com/cheternal7890/Apple-Replication

- Developed a front-end clone of Apple's website primarily using the React Framework, Redux, Styled Components, CSS, and SaSS.
- Technologies used: React.js, Redux, Styled Components, Fade Transitions.

### Palco Chat Application

github.com/cheternal7890/Palco-Chat-App

- Developed a full-stack chat application that uses real time messaging protocols by leveraging the Chat Engine API to function as the back end and React.js acting as the front end.
- Users are able to add accounts and form group chats with other users.
- Technologies used: Chat Engine API, React.js, Node.js.

### Halcyon Light Mode Theme

github.com/cheternal7890/Halcyon-Light

- Designed a minimalistic light mode theme for Discord by curating a color palette that aligns with the company's branding scheme.
- Technologies used: Better Discord, CSS.

## Skills

### Programming Languages

JavaScript (ES6), HTML, CSS, SaSS, Java, Bootstrap

### Libraries & Framework

React, Node.js, Styled Components, Redux, Material UI

### Tools & Platforms

Git, Github, Netlify, DigitalOcean, Google Cloud CLI, Docker, VirtualBox, PostgreSQL, Nginx, Apache

## Education

### Florida International University

Bachelor of Science in Information Technology  
Expected 2025

## Relevant Coursework

Website Construction & Management, Human Computer Interaction, Java Programming, Databases, Unix System Administration

## Certifications

CompTIA A+  
Fortinet Certified Fundamentals in Cybersecurity

## Interests

Photography, Music, Science Fiction, Video Games
